homage à iannis xenakis

On the occasion of the work of **Ioannis Xenakis Hibiki Hana Ma** (1969-70) (reverberation-flower-interval), for 8 channels-tape composition that he wrote for the 1970 Osaka World Expo.

Emerged the creation of the urban-gardens project. Presenting the composition of a wandering in the urban environment of Athens. A fantastic landscape that develops in the evolution of the creation of a place. With the coexistence of challenges through small occasions, sound stimuli from nature and the human body that recall and mix modern and primitive memories harmonizing some different events in a common space.
